BAS CUSTOM CONTROL PANELS

Made in America

Our Trademark panels are built using permanently engraved labeling on a custom cut black anodized 1/8 inch aluminum panel. All will have:

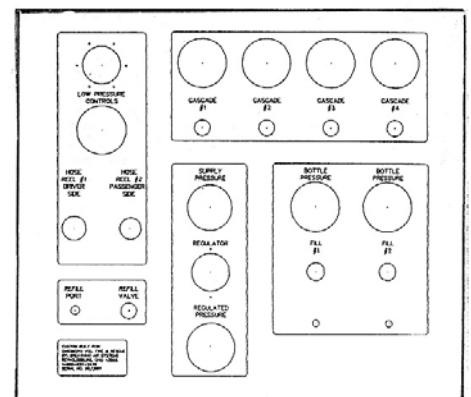

- ◆ High quality liquid filled gauges, 0-7500 psi, marked for 2216, 3000 or 4500 psi filling.
- ◆ Chrome plated 6000 psi metering valves.
- ◆ Corrosion-resistant or stainless steel front and rear fittings with stainless steel tubing.
- ◆ Heavy duty 6 foot fill whips with stainless steel tank adaptor and bleeder and high pressure quick connect fitting so the fill hoses can be disconnected and stored when not in use.
- ◆ All mobile panels include a valved refill port to refill cascades from an outside air source.
- ◆ All panels are tested in excess of 6000 psi and go through a complete quality check for workmanship and appearance.
- ◆ It takes us no longer to design and build a custom panel than it does a standard panel.

There are many options available for our control panels. Some of these include:

1. A low pressure regulator with valve, gauge and outlet port, with safety (up to 300 psi out). Can be used for Air Bags, Air Tools, operator respiration, Hose Reels, etc.
2. Regulator lockouts and covers.
3. Low pressure alarm bells.
4. Hi/Lo fill hose adaptors.
5. Adaptors to fill SCUBA
6. Booster or hose reel valves and gauges.
7. One outlet , 2 fill whips.

You draw it up, we'll build it. For detailed specifications on a standard or custom Air Control Panel, call us at 1-800-937-2479.
